

DENTAL HEALTH COVER: REDUCING BENEFITS FOR POLICY HOLDERS

Over the past five years Dental Health Funds have steadily reduced the range of treatments that members can claim. At the same time, the qualifying period for many of the more expensive treatments are being extended.

The result is that members are progressively getting less value for their dental insurance dollars.

But there are alternatives to these tight restrictions. These are alternatives that enable you to choose who treats you, where you are treated and ensure you have all treatment options available when you need them.

They also ensure you get the full rebate for your premiums.

**Ask us about the alternatives
and regain your freedom of
choice and full value from
your dental dollars.**
